

ATS Compatibility Report

Resume vs Job Description Analysis

Candidate Name

Pooja Bansal

Target Role

AI/ML Engineer

 **Low Match**

VERDICT

Executive Summary

- Pooja is an experienced BI and financial analyst with 8+ years in reporting, process automation, and data analysis.
- Resume demonstrates strong Excel, SQL, and BI tool expertise but no ML, Python, or deep learning experience.
- Educational background is Commerce/MBA focused; no CS, AI, or ML degree as required.
- Critical skill gaps in generative AI, neural networks, NLP, TensorFlow, PyTorch, and cloud ML platforms.

Report Snapshot

Primary Strengths 8+ years data analysis and reporting experience with BI tools, SQL and advanced Excel proficiency with automation capabilities, Experience with multiple enterprise platforms and process optimization, Strong analytical mindset and problem-solving demonstrated across roles, Proven ability to work with cross-functional teams and stakeholders

Primary Risk Zero demonstrated experience in machine learning, Python programming, deep learning, or generative AI models.

ATS Score Breakdown

How the overall score of 18 / 100 was calculated

Overall ATS Match Score:

18 / 100

⚠️ Low Match

Score Breakdown

Category	Weight	Score	Assessment
Machine Learning & AI Expertise	30	0	⚠️ Critical Gap
Programming & Technical Skills	25	5	⚠️ Critical Gap
Data Science & Analytics	20	40	⚠️ Partial
Cloud Platforms & Tools	10	10	⚠️ Weak
Education & Qualifications	10	20	⚠️ Weak
Communication & Collaboration	3	80	✓ Strong
Problem-Solving & Innovation	2	60	⚠️ Partial
Total	100 / 100	215 / 100	⚠️ Low Match

Raw Score18

Critical Requirement Match0%

Final Score After Safeguards18 / 100

Interpretation

- Critical gaps in ML/AI fundamentals prevent meaningful role fit despite strong BI background.
- Python and deep learning experience are absolute requirements; candidate has neither.
- Data analysis skills transfer partially but require significant upskilling in ML-specific methodologies.

Assessment Legend

● Strong

● Partial / Weak

● Critical Gap

Mandatory Requirement Check

JD requirements vs resume evidence

Requirement	Priority	Resume Evidence	Status
5+ years real-time Machine Learning experience	CRITICAL	Resume shows 8+ years BI/analytics but zero ML project experience.	⚠️ Missing
Proficiency in Python programming	CRITICAL	Resume lists VBA, SQL, and Excel; no Python mentioned.	⚠️ Missing
Deep learning algorithms and neural networks experience	CRITICAL	No mention of GPT, VAE, GANs, or neural network implementations.	⚠️ Missing
Generative AI model development and implementation	CRITICAL	Resume contains no GenAI, LLM, or prompt engineering experience.	⚠️ Missing
Cloud platform experience (AWS, Azure, GCP)	CRITICAL	Resume mentions on-prem and enterprise tools; no cloud ML platforms listed.	⚠️ Missing
NLP techniques and tools (SpaCy, NLTK, Hugging Face)	CRITICAL	No NLP experience demonstrated in resume.	⚠️ Missing
ML frameworks (TensorFlow, PyTorch, Keras)	CRITICAL	Resume lists BI tools only; no ML frameworks mentioned.	⚠️ Missing
Degree in CS, AI, ML, or related field	CRITICAL	MBA in Business Management and B.Com in Financial Management; not CS/AI/ML.	⚠️ Missing
Data structures and algorithms knowledge	IMPORTANT	Resume shows data analysis but no DSA fundamentals mentioned.	⚠️ Weak Match
Statistical modeling experience	IMPORTANT	Resume mentions statistical and modeling skills in context of forecasting.	⚠️ Partial Match
Data visualization tools (Matplotlib, Seaborn, Plotly)	IMPORTANT	Resume lists Tableau, BI, Micro Strategy; not Python visualization libraries.	⚠️ Partial Match
Problem-solving and analytical skills	IMPORTANT	Demonstrated through process optimization and dashboard creation.	✅ Match
Communication of complex technical concepts	IMPORTANT	Resume shows client handling and knowledge sharing awards.	✅ Match
Agile/Scrum methodology experience	SUPPORTING	No mention of Agile or Scrum in resume.	⚠️ Missing
15 years full-time education	CRITICAL	MBA (2008-2010) + B.Com (2005-2008) = 6 years higher ed; meets basic requirement.	✅ Match

Matched 3

Partial 2

Weak 1

Missing 9

Missing Critical 8

Assessment

- Candidate meets only 2 of 15 requirements; both are foundational (education years, communication).
- All 7 critical technical requirements are missing; no Python, ML, or deep learning experience.
- Resume demonstrates BI expertise which does not transfer to ML engineering role requirements.

Candidate Strengths & Transferable Skills

Where the resume shows strong professional value

Data Analysis & Reporting Expertise

8+ years building dashboards, reports, and analytics solutions using BI tools and SQL.

SQL & Advanced Excel Proficiency

Strong database querying and automation skills with VBA, macros, and complex Excel functions.

Process Automation & Optimization

Demonstrated ability to streamline workflows, reduce processing time, and implement automation frameworks.

Cross-Functional Collaboration

Proven track record working with stakeholders, management, and diverse teams across geographies.

Enterprise Platform Implementation

Experience implementing SAP, Oracle, ARIBA, and other complex enterprise systems.

Problem-Solving Mindset

Consistently identifies business issues and develops data-driven solutions and insights.

Evidence Highlights

- Built automation framework reducing 2/3 processing time; generated 120 hours monthly savings via P2P automation.
- Analyzed 650+ employees' time data to provide actionable insights to top management.
- Successfully implemented centralized MIS reporting across SAP, BI, CONCUR, ARIBA, and PeopleSoft.
- Created personalized database solutions and dashboards for stakeholder reporting and analysis.

Why these matter

- Data analysis skills are foundational but insufficient; ML requires statistical modeling beyond BI reporting.
- SQL proficiency is valuable but Python is mandatory for ML engineering; different ecosystems.
- Automation experience shows technical aptitude but lacks ML-specific algorithm implementation.

Critical Skill Gaps

Main factors reducing alignment with the target role

No Machine Learning Experience

PRIORITY: CRITICAL

Resume contains zero ML projects, models, or algorithms; 5+ years required.

 **Critical**

No Python Programming Skills

PRIORITY: CRITICAL

Resume lists VBA, SQL, Excel; Python is mandatory for ML frameworks.

 **Critical**

No Deep Learning or Neural Network Experience

PRIORITY: CRITICAL

No mention of GPT, VAE, GANs, TensorFlow, PyTorch, or Keras.

 **Critical**

No Generative AI or NLP Experience

PRIORITY: CRITICAL

Resume lacks GenAI, LLM, prompt engineering, or NLP tool experience.

 **Critical**

No Cloud ML Platform Experience

PRIORITY: CRITICAL

Resume shows on-prem enterprise tools; no AWS, Azure, or GCP ML services.

 **Critical**

Wrong Educational Background

PRIORITY: CRITICAL

MBA in Business Management; role requires CS, AI, or ML degree.

 **Severe**

Bottom Line

- Candidate is fundamentally misaligned with AI/ML Engineer role; BI background does not bridge gap.
- Would require 2-3 years of intensive ML/Python training to meet minimum qualifications.
- Current skill set is valuable for BI/Analytics roles but not transferable to ML engineering.
- Recommend exploring BI Manager, Data Analyst, or Analytics Engineer roles instead.

28

ESTIMATED CORE KEYWORD COVERAGE

What this means

- Only 8 of 40+ critical ML/AI keywords present; 32 essential terms completely missing.
- Matched keywords are BI-focused (SQL, Reporting, Dashboards); ML keywords entirely absent.
- Partial matches show adjacent skills but lack ML-specific technical depth.
- Keyword gap indicates candidate has not pursued ML/AI development path.

Resume Quality & ATS Optimization Issues

Improvements needed independent of role-specific skills

Resume Health Check

Check	Score	Status	Finding	Recommended Fix
ATS Parsing Reliability	75/100	Moderate	Resume has formatting inconsistencies with special characters (§) and irregular spacing.	Remove special characters; use standard bullet points for ATS compatibility.
Section Detection	85/100	Strong	All major sections present: Education, Experience, Technical Proficiency, Triumphs, Projects.	Add Certifications section if any ML/cloud certifications obtained in future.
Formatting Safety	70/100	Moderate	Mixed formatting with § symbols, inconsistent spacing, and varied bullet styles.	Standardize to simple bullets; remove decorative characters for ATS safety.
Readability	72/100	Moderate	Dense paragraphs in Professional Summary; some sections lack clear structure.	Break Professional Summary into shorter, scannable bullet points.
Language Quality	78/100	Moderate	Generally professional but some awkward phrasing: 'Pear to Pear' likely 'Peer to Peer'.	Proofread for typos; correct 'Pear to Pear' to 'Peer to Peer'.
Bullet Structure	80/100	Strong	Most bullets follow action-verb structure with clear outcomes and metrics.	Ensure all bullets start with strong action verbs; some are passive.
Action Verbs	82/100	Strong	Strong verbs used: Implemented, Streamlined, Built, Analyzed, Designed, Optimized.	Maintain action-verb focus; avoid passive constructions in future updates.
Repetition	65/100	Needs Work	Repeated phrases: 'Successful transition', 'Responsible for', 'Proficient in' appear multiple times.	Vary language; replace repeated phrases with synonyms for better impact.
Grammar Clarity	80/100	Strong	Grammar is generally correct; minor issues like 'Martindate.com' (likely Martindale).	Verify company names and correct any spelling errors.
Resume Length	75/100	Moderate	Resume is 3 pages; appropriate for 8+ years experience but dense.	Consider condensing to 2 pages by removing redundant phrases and older internship details.
Contact Parsing	88/100	Strong	Contact info clearly presented: name, DOB, address, phone, email at top.	Remove DOB for privacy; keep phone and email only.

Detected sections Contact Information, Professional Title, Objective/Summary, Education, Area of Expertise, Professional Summary, Triumphs/Awards, Experience, Projects, Technical Proficiency

Missing sections Certifications, Publications, Languages, Volunteer Experience, Professional Memberships

Priority Resume Issues

#	Issue	What was found	Recommendation
1	Special Characters in Formatting	§ symbol used for bullets; may not parse correctly in ATS systems.	Replace all § with standard bullet points (•) for universal ATS compatibility.
2	Typo: 'Pear to Pear' Award	Should likely be 'Peer to Peer' award; typo undermines credibility.	Correct to 'Peer to Peer' or verify exact award name with employer.
3	Typo: 'Martindate.com'	Project name appears misspelled; likely 'Martindale.com'.	Verify correct project name and correct spelling.
4	Overly Dense Professional Summary	Long paragraph format with multiple § bullets; hard to scan quickly.	Restructure into 3-4 concise bullet points highlighting key achievements.
5	Repetitive Language	Phrases like 'Successful transition', 'Responsible for', 'Proficient in' repeated throughout.	Use varied action verbs and phrasing to improve readability and impact.
6	Missing Certifications Section	No certifications listed; relevant for BI/Analytics roles.	Add Certifications section if any BI, SQL, or analytics certifications held.
7	Date of Birth Included	DOB (04 Sep 1987) exposed; privacy and potential age discrimination risk.	Remove DOB; keep only name, location, phone, and email.
8	Internship Listed as Full Experience	Marvel InfoTech internship (2010-2013) listed as 'Business Analyst' without 'Internship' label.	Clearly label as 'Business Analyst (Internship)' to avoid confusion.

ATS Optimization Priority

- 1 Remove special characters (§) and standardize to bullet points for ATS parsing.
- 2 Correct typos: 'Pear to Pear' → 'Peer to Peer'; verify 'Martindate.com' spelling.
- 3 Restructure Professional Summary into 3-4 concise, scannable bullets.

Final Verdict & Recommended Action Plan

Next steps for the strongest career positioning

Best-Fit Roles Today

Business Intelligence Manager

Senior Data Analyst

Analytics Engineer

Financial Analyst

Data Reporting Specialist

Recommended Next Steps

- Acknowledge skill gap: ML/AI engineering requires 2-3 years of Python and ML training.
- Recommend exploring BI Manager or Senior Analytics roles aligned with current expertise.
- If pursuing ML: enroll in Python, TensorFlow, and ML fundamentals courses immediately.
- Update resume to remove special characters, fix typos, and restructure for ATS compatibility.
- Consider obtaining cloud ML certifications (AWS ML, Azure AI) if pivoting toward AI/ML.

CareerSense Recommendation

- Candidate is overqualified for entry-level BI roles but underqualified for AI/ML Engineer position.
- Current resume is optimized for BI/Analytics; completely misaligned with ML engineering requirements.
- Recommend reframing resume for BI Manager, Senior Analyst, or Analytics Engineer roles.
- If ML transition desired: pursue formal ML degree or intensive bootcamp before applying to ML roles.

This report is an indicative assessment designed to help improve resume-job alignment and ATS readiness. The score is not generated by, or representative of, the employer's actual Applicant Tracking System.
